

WHO AM I? - PHOTO DUEL

Organised by Finance Club, BIT Mesra

1. Event Overview

Who Am I? - Photo Duel is a two-player guessing game where each participant has only a photograph of a personality placed on their head. The photograph is visible to the opponent but hidden from the participant themselves. Players take turns asking yes or no questions to deduce the identity shown in the photograph. Each participant is allotted a fixed time of five minutes, and all actions including questioning and guessing are deducted from the player's own time. The first player to correctly identify their personality, or the player whose opponent's time runs out, is declared the winner.

2. Participation Details

- Players per Match: 2 (one versus one duel)
- Time Allocation: Five minutes per contestant
- Match Type: Head-to-head
- Tournament Format: Knockout or League
- Prior Knowledge Required: None

3. Game Materials

The game uses only photo cards as the core material. Each photo card contains a clear printed photograph of a personality. The card does not contain any name, text, hint, or additional information.

4. Game Setup

Two participants are called to the play area. Organisers randomly select one photo card for each participant and place it on the participant's head using a headband, clip, or tape. Participants can see the opponent's photo but cannot see their own. Both players' timers are set to five minutes before the match begins.

5. Gameplay Workflow

Turn and Time Structure

Only one player's timer runs at a time. Player A starts, decided randomly. When a player's turn begins, their timer starts running. When the turn ends, the timer pauses and the opponent's timer starts.

Question Rules

On each turn, a player may ask only one yes or no question. After the question is answered, the turn automatically ends. All thinking time, questioning time, and guessing time is deducted from the player's own timer. The opponent must answer strictly with yes or no.

Guessing Rule

A player may make one guess per turn, only after asking their single question. Guessing does not stop the timer. If the guess is correct, the player wins immediately. If the guess is incorrect, the turn ends immediately and passes to the opponent.

6. Time-Out Conditions

If a player's five-minute timer reaches zero at any point, that player loses the match immediately and the opponent is declared the winner.

7. Winning Criteria

A player wins the match if they correctly identify the personality shown on their head before their timer runs out, or if the opponent's timer reaches zero first.

8. Student Management Structure

- Event Head: Overall coordination
- Moderator: Rule enforcement and decision-making
- Timekeeper: Managing individual player timers
- Photo Card Manager: Shuffling and placing photo cards
- Volunteers: Player coordination and crowd handling
- Marketing Team: Promotions and content coverage

9. Requirements and Logistics

- Printed photo-only personality cards
- Headbands, clips, or tape
- Two stopwatches or a chess-timer application
- Microphone for stage-based execution (optional)
